

HIGH SPEED TONERS

ARTISTS' TIPS AND TRICKS

@CORYHOFFMANHAIR SAYS:

USE TO SHIFT OR CANCEL OUT UNWANTED TONES, EX: USING NEW DIRTY PINK TO SHIFT OUT LEFT OVER GREEN TONES AND CANCEL THEM OUT.

- For this scenario, mix Dirty Pink 1:4 6 VOL and process for 2 minutes on dry hair. To slow down the process, apply to damp hair.

USE AS A FILLER WHEN COLORING HAIR BACK DARKER FROM BLONDE.

- High Speed Toners are great when you need to add warm tones into the hair when your client would like to go from light to dark. To achieve a true, even color result, use a toner to "fill" in or add the missing warm undertones.

MAX OUT YOUR HIGH SPEED TONER AT THE BASE AS A PRE-TONER BEFORE APPLYING A SEMI.

- For example, processing a High Speed Toner for full 20 minutes at the base while leaving it more sheer from mid-lengths to ends will create a shadow root effect once you do an all-over application of your semi.
- Having variations of tones, i.e. "maxing out" color in some places and sheering it out in others and then applying your semi will affect the end result.

USE A VARIETY OF OUR TONERS AS A PRE-TONER BEFORE APPLYING A PASTEL SEMI TO CREATE DIMENSION.

ADD GOLDEN SHIMMER TO COOLER TONED TONERS LIKE ICY FOR A BRIGHTER END RESULT.

TO CREATE BALANCE FROM ROOT TO TIP, TONE THE BASE WITH ANY COOL-BASED TONER AND THEN ADD GOLDEN SHIMMER TO YOUR MID-LENGTHS AND ENDS FORMULA.

@TAWNI.COSMO SAYS:

ROSE GOLD CAN BE USED TO NEUTRALIZE GREEN UNDERTONES THAT ARE LEFT OVER FROM VIVID COLOR APPLICATIONS. IT IS RECOMMENDED TO USE 1:4 RATIO WITH 6 VOL AND LEAVE ON FOR APPROXIMATELY 2-5 MINUTES OR UNTIL DESIRED END RESULT IS REACHED.

USE LILAC CHILL AS A PRE-TONER BEFORE APPLYING PURPLE SEMIS SUCH AS JAM & ELIXIR TO ACHIEVE MORE EVEN APPLICATION & LONGER LASTING RESULTS.

@BEAUTYATDAWN SAYS:

GOLDEN SHIMMER IS A GREAT TONER FOR BLENDING GREY BECAUSE OF THE TONER'S ALKALINITY.

- i.e. the toner can slightly lift and deposit tone. Developer and processing time will be dependent on the desired end result, the state of your clients' hair and amount of desired grey coverage.

@COCOHOFFMAN SAYS:

USE COPPER BLONDE AS A PRE-TONER BEFORE APPLYING FACTION8 COPPERS OR SEMIS SUCH AS NUCLEAR OR SHAG RUG TO ACHIEVE MORE EVEN APPLICATION & LONGER LASTING RESULTS.

HIGH SPEED TONERS CAN BE USED TO BASE BREAK OR CREATE DEPTH IN THE HAIR.

- For example: on highlighted hair, use toners Moon Stone, Platinum Pearl or Golden Shimmer & mix 6 or 10 VOL in 1:3 ratio and process for 5 minutes. Shade selection will depend on your clients' desired end result.

WHEN USED IN FOILS AND PROCESSED FOR 10 MINUTES (PROCESSING TIME CAN BE ADJUSTED DEPENDING ON HAIR DENSITY) IS A GREAT WAY TO ADD QUICK DIMENSION (THINK LOWLIGHTS).

@JULIEEVOLVS SAYS:

HIGHLIGHT WITH MOON STONE OR ICY ON A LEVEL 7 OR HIGHER TO ADD DIMENSION WITHOUT HAVING TO REACH FOR LIGHTENER.
